

You like freshness. *That's why I love my job.*

abc FRESH Delivering happiness is part of our philosophy at AirBridgeCargo. Handling the most delicate and beautiful flowers from around the world and getting them to their destination, as fresh as when they were first cut, is a complex task that requires me to know every one of my moves. It's

also a very rewarding task. That's why I love my job. At AirBridgeCargo, we keep it cool and fresh. Always. Worldwide.

Your benefits:

- Highest priority during booking and cargo loading
- 24/7 monitoring from acceptance to delivery
- Controlled temperature conditions across the entire globe
- Certified team of perishables experts
- Temperature monitoring throughout the entire journey

We also offer:

- Special packaging solutions and thermal blankets
- Installation of temperature controlled cells in SVO
- Expedited delivery upon arrival and possibility of reefer trucks
- Eximinations by local phytosanitary authorities under temperature controlled conditions
- freight and product for all time sensitive shipments to guarantee priority space

READY FOR NEW CHALLENGES

We proudly serve **over 35 destinations** across the globe with our modern **Boeing 747-8F fleet**. Our aircrafts have a state-of-the-art control system that allows to reduce humidity and set four independently controlled temperatures in each cargo compartment (+4 to +29°C).

Our worldwide team of more than **900 cargo professionals** are experts when it comes to finding the most efficient cargo solutions, no matter how complex the shipment. Whether it involves transporting large quantities of flowers, fresh salmon from Norway or cheese from Italy across continents – you name it, we ship it.

We keep it cool and fresh for you.

We always book perishable goods on **most direct route**, with fewest transit stops, thereby minimizing the elapsed time and eliminating unnecessary climatic changes. When a transfer from one flight to another is unavoidable, we keep transit times as brief as possible. As some shipments may require re-icing or temporary storage in a **temperature-controlled** area, they are stored in cool-rooms or freezers.

Please note: to avoid risk of delay, perishable shipments should travel as booked cargo. Shippers are encouraged to reserve space for all perishable consignments and allow sufficient time if special arrangements are necessary.

e-SERVICES

Anywhere and anytime:

We offer 24/7 customer service and you can easily view our flight schedule, book your shipment and track & trace previous shipments online on www.airbridgecargo.com.
